EDUCATION

BACHELOR OF SCIENCE IN MOLECULAR BIOLOGY AND BIOCHEMISTRY

Simon Fraser University, Burnaby BC, Canada | 2016 - 2019

ASSOCIATE OF SCIENCE DEGREE IN BIOINFORMATICS

Langara College, Vancouver BC, Canada | 2011 - 2016

EXPERIENCE

RESEARCH ASSISTANT – Leroux Laboratory, Simon Fraser University

Burnaby, BC, Canada | February 2018 – December 2018

- + Identified novel ciliary proteins using computational techniques
- + Used GFP tagging to determine the localization of candidate ciliary proteins
- + Facilitated lab research goals by maintaining a variety of *C. elegans* strains

CLEAN TECH INTERN – Langara College

Vancouver, BC, Canada | May 2017 – April 2018

- + Collaborated with academic and industry professionals on three federally-funded research projects

Insect Based Sustainability

- + Supervised a team of seven students in proper lab technique, data collection procedures and presentation skills
- + Designed and ran a one-year experiment proving mealworms could consume waste food and Styrofoam
- + Primary author on a research paper to be published in Fall 2019

Waste Water Treatment

- + Showed that biochar could be used to remove 0.5% of ammonia from contaminated water
- + Ran experiments to measure biochar's ability to absorb and store ammonia

Microbial Analysis of Beer

- + Designed PCR primers against 16S and ITS rRNA to check for beer-spoiling bacteria

- + Created experiments to identify the molecular causes of beer yeast degradation
- + Prepared agar plates to grow beer specific yeast species

JUNIOR SOFTWARE ENGINEER – GenomeDx Biosciences

Vancouver, BC, Canada | May 2014 – December 2014

- + Collaborated with researchers at the University of Miami and GenomeDx to validate prognostically-significant biomarkers
- + Identified relationships between immunohistochemical and gene expression data
- + Increased the speed of microarray analyses by designing a new quality control pipeline

LAB ASSISTANT – Morin Laboratory, Simon Fraser University

Burnaby, BC, Canada | September 2012 – January 2013

- + Downloaded and installed pipeline analysis tools for a local Galaxy instance
- + Used patient data from BC Cancer Agency to create PCR primers for further study of specific mutated regions
- + Aided in-lab tasks such as using an Illumina sequencer, running gels and sterilizing lab equipment
